

The Curriculum Vitae of Stefan Frede

Hi there, I am Stefan. I am a freelance front-end developer from Germany based in Hamburg and Velbert. Because I am travelling while working, I can be found all over Europe.

I have been working in this business for over 10 years now and I am specialised in the conception and creation of functional, content sensitive web pages. My approach is to look ahead, not into the past. That's why I develop web pages with the rich feature set of modern browsers in mind while making sure that older browsers with a more limited feature set still display the website as best as possible.

Skills

- [HTML](#)
- [CSS](#)
 - [SASS/SCSS](#)
- [JavaScript](#)
 - [Crocks](#)
 - [Cypress](#)
 - [Jest](#)
 - [Polymer](#)
 - [LitElement](#)
 - [Ramda](#)
 - [Redux](#)
 - [Redux-Saga](#)
 - [socket.io](#)
 - [Webpack](#)
- [CSS Frameworks](#)
 - [Bootstrap](#)
 - [Bulma](#)
- [Source Control](#)
 - [Git](#)
- [Virtualization](#)
 - [Docker](#)

Experience

Because the web is a fast moving place I am only outlining the last couple of years.

- [ARIGO Software GmbH](#) (07/2017 + today)
 - Maintaining existing and building new web components using HTML, CSS, JavaScript (jQuery, Polymer 1 + 2 and Webpack).
 - Building a function decorator for `socket.io` to communicate with the REST API using Crocks, Redux, Redux-Saga, socket.io, and Webpack.
- [50plus-Treff GmbH](#) (11/2010 + today)
 - Maintaining the existing website and implementing change requests using HTML, CSS (SCSS) and JavaScript (Bower, Gulp, jQuery, Webpack).
 - Implementing the Redesign by working from Photoshop mock-ups and reworking the complete Front-end stack using HTML, CSS (SCSS) and JavaScript (Bower, Gulp, jQuery, Webpack).
 - Worked from Photoshop design mock-ups to create web pages using valid, standards based code which performed in various browser environments using HTML and CSS.
- [tracdelight GmbH](#) (11/2016 + 06/2018)
 - Maintaining the API using HTML, CSS and JavaScript.
- [72sign](#) (10/2013 + 05/2018)
 - Worked from Photoshop design mock-ups to create static web pages using valid, standards based code which performed in various browser environments using HTML and CSS.
 - Developed [Brautgalerie München](#) using [Yeoman](#) ([yo](#), [Grunt](#), and [Bower](#)), HTML, CSS (SCSS with [Bourbon](#)) and JavaScript (jQuery).
 - Developed [NOVALICHT](#) using HTML, CSS and JavaScript (jQuery).
- [Experteer GmbH](#) (11/2005 + 07/2017)
 - Realized a CSS/SCSS Front-end Styleguide prototype using Markdown, CSS (SCSS w/ [Compass](#)) and JavaScript (Gulp).
 - Realized the [[Headhunter of the Year website](#)][<http://www.headhunter-of-the-year.com>] with [Squarespace](#).
 - Working in a large team of software engineers, I was responsible for the initial build of the website as well as for a lot of in-house tools. I implemented code standards, to enable the larger team to construct front-ends and focused on front-end performance, scalability, architecture and maintainability. For building this front-end components I was using HTML, CSS (SCSS), JavaScript ([Backbone.js](#), jQuery) in a Rails stack website.
- [Wildsterne GmbH](#) (06/2011 + 01/2014)
 - Built HTML templates based on existing designs using valid, standards based code which performed in various browser environments using HTML and CSS.
- [Termine24](#) (05/2012 + 07/2012)
 - Built HTML mail templates based on existing designs using valid, standards based code which performed in various email clients using HTML.
- [Voycer AG](#) (05/2011 + 08/2011)
 - Worked from Photoshop design mock-ups to create web pages using valid, standards based code which performed in various browser environments using HTML and CSS (SCSS).
- [Studio M.U.C](#) (03/2011 + 11/2011)
 - Worked from Photoshop design mock-ups to create static web pages using valid, standards based code which performed in various browser environments.
 - Developed [Stierblut](#) using [ExpressionEngine](#), HTML and CSS.
 - Developed [Laurel Online](#) using [ExpressionEngine](#), HTML and CSS._
 - Developed [VSLeichtbau](#) using HTML, CSS and JavaScript (jQuery)._

I started out as a PHP developer in 2003 and then bit by bit moved into front-end programming. During this transition I developed Adobe Flash pages with ActionScript, set up a lot of WordPress pages, played around with Ruby On Rails, and worked with multiple Content Management Systems. Already during that period I always did my share of front-end related work until eventually I decided to concentrate on it full-time. Since 2004 I have been working as a full-time freelancer.

Interests

For the rare occasions that I am not in front of my computer, I spend my time hiking, running, and exploring the town I'm at.
